ENVIRONMENTAL POLICY

Network Electrical Servicing recognises that their daily activities could potentially have an affect on the environment and have made a commitment to:

- carry out its operations with minimal impact on the environment;
- comply with applicable corporate, environmental legislative and regulatory requirements;
- continual improvement in environmental performance and prevention of pollution;
- set and review Environmental targets at the annual Management Meeting;
- implement and maintain Environmental System;
- educate and train employees for awareness of the relevant environmental issues;
- reduce electricity and fuel usage

We will promote this Environmental Policy to all interested parties including our employees, contractors, customers and the community through company web site, notice board and Health and Safety handbook.

REDUCTION OF WASTE

To decrease waste output where possible we:

- **Reduce, Reuse and Recycle:** cardboard, copy paper, plastic, aluminium and glass bottles, cans, tins, empty aerosol cans, polystyrene, used ink cartridges & toners, batteries, old computer, monitors, printers and accessories, oil, scrap steel and wire off cuts, fluorescent tubes and lamps, plastic TPS cable and Migwire drums;
- encourage staff to use electronic forms of communication and filing where possible to reduce consumption of paper;
- have effective procedures in place to deal with waste and circulate information to help with waste management;
- make waste management as simple as possible to maintain effectiveness.

PURCHASING

Where possible purchase environmentally friendly or low energy products.

OTHER

In addition we will encourage: a similar green policy at home and a smoke free environment.
